Module Handbook Quality management in maritime operations

Scheme & Program	M.Sc. Shipping Management			
Module Title	Quality management in maritime operations			
Module Code				
Module Start Date/ Cohort	2021-22			
Module Level	Level 7	Credit Rating	[5 ECTS credits]	
Total study time	24 hours academic directed time 3 hours lecture per week	Hours of independent Learning and time for assessments	125 hours of teaching and independent learning and time for assessments	
Module Leader& Lecturer:	Assistant Professor Maria Karakasnaki Mr. Stavros Meidanis			
Email:	mariakar@unipi.gu			
Room:				
Office Hours:	Please email me for any queries or see me in sessions.			
Seminar Tutor(s):				
Program Director:	Professor Angelos Pantouvakis			
Administrator contact:	Mrs. Maria Varoucha, 2104142504			
Administrator e-mail:	shipman@unipi.gr			
Lecture day & time:	Weekdays 18.00-21.00			
Seminar day & time:				

1. Welcome Note

Welcome to the "Quality management in maritime operations" module of the M.Sc. in Shipping Management Program of the Department of Maritime Studies at University of Piraeus. This module helps students learn and understand the fundamentals of quality management in maritime operations.

2. Module aims

- To provide the necessary knowledge on the basic quality related concepts in shipping
- To critically assess the significance of effective quality management in maritime operations and business decisions
- To assist students to understand the fundamentals of quality and safety standards applicable in the maritime industry and to examine their contribution towards increasing quality levels in shipping.

3. Learning Outcomes-what you will gain from taking the module:

By the end of this module, students should be able to:

- understand the concepts of quality and quality management in the context of the shipping
- describe the main quality and safety standards that characterize the operations of maritime companies
- critically evaluate the importance of effectively implementing quality management systems in shipping

4. Indicative Module Content:

This module will develop on theoretical and empirical topics in quality management that concern the operations of shipping companies. More specifically, the content of the module includes theoretical description of the quality and quality management concepts, analysis of the International Safety Management (ISM) Code, International Ship and Port Facility Security (ISPS) Code and Maritime Labor Convention, 2006, as well as investigation of ISO 9000 standards, TMSA, DBMS, risk management and inspections issues.

5. How the module is taught, attendance and the teaching schedule:

The module will utilize flexible, responsive and interactive learning environments using a combination among lectures, seminars, workshops and independent self-assessment tasks, to encourage students' ability to think critically and creatively. Thus, critical thinking will be achieved through case studies and real quality management scenarios. Employability and educating the whole person process will be achieved through the application of knowledge and case studies.

a. Teaching Schedule per every one of the 8 weeks

Г

Lecture Date	Торіс				
Week 1	 Quality and quality management Introduction to the concepts of quality and quality management Traditional view on quality versus total quality perspective Total quality elements Quality gurus 				
	Reading Material:				
	Chen, K. K., Chang, C. T., & Lai, C. S. (2009). Service quality gaps of business customers in the shipping industry. Transportation Research Part E: Logistics and Transportation Review, 45(1), 222-237.				
	Thai, V. V. (2008). Service quality in maritime transport: conceptual model and empirical evidence. Asia Pacific Journal of Marketing and Logistics, 20(4), 493-518.				
	Yuen, K. F., & Thai, V. V. (2017). Corporate social responsibility and service quality provision in shipping firms: financial synergies or trade-offs?. Maritime Policy & Management, 44(1), 131-146.				
	Powerpoint presentation slides				
Week 2	 International Safety Management (ISM) Code Description Objectives Structure Safety management system: A case study 				
	Reading Material:				
	Bhattacharya, S. (2012). The effectiveness of the ISM Code: A qualitative enquiry. Marine Policy, 36(2), 528-535.				
	Celik, M. (2009). Designing of integrated quality and safety management system (IQSMS) for shipping operations. Safety Science, 47(5), 569-577.				
	IMO (International Maritime Organization) (2010). ISM Code, International Safety Management Code and Guidelines on Implementation of the ISM Code. London: IMO Publishing.				

	Pun, K. F., Yam, R. C., & Lewis, W. G. (2003). Safety management system registrationin the shipping industry. International Journal of Quality & Reliability Management, 20(6), 704-721.			
	Batalden, B. M., & Sydnes, A. K. (2014). Maritime safety and the ISM code: a study of investigated casualties and incidents. WMU Journal of Maritime Affairs, 13(1), 3-25.			
	Powerpoint presentation slides			
Week 3	Human factor in shipping			
	 Presentation of Maritime Labour Convention (MLC, 2006) Content of MLC, 2006 Seafarer's welfare and MLC, 2006 			
	Reading Material:			
	Seafarers' welfare: A critical review of the related legal issues under the MaritimeLabour Convention 2006			
	Piniella, F., Silos, J. M., & Bernal, F. (2013). Who will give effect to the ILO's Maritime Labour Convention, 2006?. International Labour Review, 152(1), 59- 83.			
	Mantoju, C. D. (2021). Analysis of impact of the maritime labour convention, 2006: A seafarer's perspective. Journal of International Maritime Safety, Environmental Affairs, and Shipping, 5(3), 107-119.			
	Powerpoint presentation slides			
Week 4	Safety vs Security			
	 International Ship and Port Facility Security Code (ISPS Code) Objectives Content Structure 			
	Reading Material:			
Thai, V. V. (2007). Impacts of security improvements on service quali transport: An empirical study of Vietnam. Maritime Economics & Log 335-356.				
	Thai, V. V., & Grewal, D. (2007). The maritime security management system: Perceptions of the international shipping community. Maritime Economics &Logistics, 9(2), 119-137.			
	Sadovaya, E., & Thai, V. V. (2015). Impacts of implementation of the effective maritime security management model (EMSMM) on organizational performance ofshipping companies. The Asian Journal of Shipping and Logistics, 31(2), 195-215.			
	Powerpoint presentation slides			

Week 5	Best Practices Guide for Vessels' Operators (TMSA/ DBMS)				
	 Scope of Best Practices in Shipping Management Requirements for Tankers/ Bulk Carriers Structure Operational Performance & KPIs 				
	Reading Material:				
	Knapp, S., Bijwaard, G., & Heij, C. (2011). Estimated incident cost savings in shippingdue to inspections. Accident Analysis & Prevention, 43(4), 1532-1539.				

	Heij, C., Bijwaard, G. E., & Knapp, S. (2011). Ship inspection strategies: Effects on				
	maritime safety and environmental protection. Transportation research part D:				
	Powerpoint presentation slides				
Week 6	Risk management and Risk assessment				
	Scope of Risk Management				
	Main Principles				
	Methodology				
	 Fractical Approach (including examples and case studies) 				
	Reading Material:				
	Karahalios, H. (2014). The contribution of risk management in ship management: the case of ship collision. Safety Science, 63, 104-114.				
	Mazaheri, A., Montewka, J., & Kujala, P. (2014). Modeling the risk of ship grounding—a literature review from a risk management perspective. WMU Journal of Maritime Affairs, 13(2), 269-297.				
	IMO (International Maritime Organization) (2010). ISM Code, International Safety Management Code and Guidelines on Implementation of the ISM Code. London: IMO Publishing.				
	Powerpoint presentation slides				
Week 7	Management Systems				
	 ISM Code - Scope Auditing (Onboard/ onshore) Quality Standard ISO 9001 Environmental Standard ISO 14001 Continuous Improvement Cycle -Deming Cycle Auditing examples 				
	Reading material				
	Pantouvakis, A., & Psomas, E. (2016). Exploring total quality management applications under uncertainty: A research agenda for the shipping industry. Maritime Economics & Logistics, 18(4), 496-512.				
	Cheng, T. C. E., & Choy, P. W. (2013). A study of the relationships between quality management practices and organizational performance in the shipping industry. Maritime Economics & Logistics, 15(1), 1-31.				
	Powerpoint presentation slides				
Week 8	Safety inspections and audits				
	Purpose of different inspections & audits				
	Audit techniques (Onboard/ onshore)				
	Inspection & Audits onboard				
	Practical Examples				
	Reading Material:				

Degré, T. (2007). The use of risk concept to characterize and select high risk vessels for ship inspections. WMU Journal of Maritime Affairs, 6(1), 37-49.
Knapp, S., & Franses, P. H. (2007). Econometric analysis on the effect of port state control inspections on the probability of casualty: Can targeting of substandard ships for inspections be improved?. Marine Policy, 31(4), 550-563.
Powerpoint presentation slides

6. Assessment

The module will be assessed on the basis of:

A) Written exams (100%): A 2-hour written exam test.

Assessment Title and Brief Description	Word count/ Hrs where applicable	Weight	Submission deadline	Submission method	Feedback date	How feedback is provided
Written exams	2hrs	100%	TBD	In class	TBD	Electronically

Note: Any changes to the assessment schedule will be communicated by e-mail and/ or announcement on the module's E-College pages.

Assessment Criteria	Weighting
Theory Subject 1	30%
Analysis of the topic (50%)	
Critical thinking (50%)	
Theory Subject 2	30%
Analysis of the topic (50%)	
Critical thinking (50%)	
Theory Subject 3	40%
Analysis of the topic (50%)	
Critical thinking (50%)	

Marks will be based on the content of the final submission assuming that all the milestones above have been met.
